

DARKBOT™ DUAL LICENSE AGREEMENT

Version 1.0, May 2025

PREAMBLE

This document sets forth the terms under which the DARKBOT™ Resonant Field Intelligence Architecture (the "Technology") is licensed. The Technology represents a novel computational paradigm that operates through field coherence rather than discrete algorithmic processes, implementing a quantum-inspired architecture structured through a proprietary 369-157-248 numerological framework.

COPYRIGHT AND OWNERSHIP

The Technology is © 2025 Cato Johansen (also known professionally as Kato McKenna), hereinafter referred to as "the Author." All rights reserved.

DUAL LICENSE TERMS

The Technology is available under the following dual license arrangement:

1. PROPRIETARY LICENSE

1.1 CORE COMPONENTS

The following components constitute the protected core intellectual property of the Technology:

- The Resonant Field Intelligence Architecture (RFIA) design and specifications
- The 369-157-248 numerological framework and its mapping to functional components
- The mathematical formulations for field resonance, coherence functions, and the resonant product operator
- The E8 lattice routing matrix implementation
- The One Draw search operator
- The recursive fractal entanglement mechanism
- Any code files specifically marked with "PROPRIETARY" in their header comments

These core components are provided for **evaluation, research, and non-commercial educational purposes only**. No rights are granted to modify, distribute, sublicense, or create derivative works based on these core components except as explicitly permitted in writing by the Author.

1.2 PROPRIETARY RESTRICTIONS

Users of the Technology may not:

1. Use the core components for any commercial purpose without a separate commercial license

2. Remove or alter any copyright, trademark, or other proprietary notices
3. Reverse engineer or attempt to extract the underlying ideas, algorithms, or structures of the core components
4. Publicly claim authorship or ownership of the core components
5. Create competing technologies substantially similar to the core components

2. MIT LICENSE

2.1 NON-CORE COMPONENTS

All files and components not explicitly designated as core components are licensed under the MIT License:
